The Black Death in English towns - JSTOR

The Black Death in English towns RICHARD BRITNELL » It seems likely that historians in the past have seriously underestimated the number of English townsmen in the early fourteenth century In London alone there may have been 80-100,000 around 1300 The population of Norwich in the early fourteenth century was higher than used to be thought, and it was growing: Rutledge proposes 17,000 for

ENGLISH MEDIEVAL POPULATION: RECONCILING TIME SERIES ...

population was declining in the aftermath of the Black Death, a ratio as high as 40 to 45 per cent in the 1370s is improbable and a lower ratio more likely The second assumption of Russell that was challenged by Postan concerns the assumed rate of under-enumeration Russell's figure of 5 per cent is based on an examination of the distribution of terminal numbers of local tax returns for

Number 6988, 23 January 2020 Mental health statistics

Those identifying as Black were more likely than average to have experienced a CMD in the last week, with non-British people identifying as White people less likely This data is adjusted to account for the different age structures of populations in different ethnic groups Common mental disorder in the last week Trends 1993-2014 1993 2000 2007 2014

troubles, compounded by pestilence (the Black Death of 1349 and subsequent epidemics), resulted in a sharp fall in population and the contraction or desertion of settlements on marginal soils Direct cultivation by landlords continued on some home farms, but in most areas farms on estates became leased out - in whole or in part - to tenants, a process often accompanied by the breakdown of

An Archaeological Resource Assessment of Post Medieval ...

through the 13th and early 14th century, the Black Death, and climatic deterioration in the 15th century The later 16th and 17th centuries were generally a time of rural population decline with a continuing conversion to pasture Much of this was carried out by a new generation of great landowning families who grew rich, or richer, on the spoils of former monastic houses The reduction in

Peasant Widows' 'Liberation' and Remarriage before the ...

Remarriage before the Black Death By PETER FRANKLIN Widows held a place in medieval rural society which is receiving belated recognition by historians Deceased male tenants' holdings frequently passed to widows rather than directly to sons, which explains why women commonly formed a substantial proportion of tenants They played an important role in the workings of inheritance, and on some
