Thinking of getting pregnant? - NHS

baby or might get pregnant, speak to your doctor to arrange for a rubella blood test and then two MMR immunisations, if you need them, as soon as possible Even if you've had the MMR vaccine before, having two more won't do any harm (if your blood test shows you need it) It's better to be sure you're immune than risk your baby's health

Thinking of getting pregnant? - GOV UK

or might get pregnant, speak to your doctor to arrange to have two MMR immunisations, if you need them, as soon as possible You should also check with your doctor if you need any other vaccines Even if you've had the MMR vaccine before, having two more won't do any harm It's better to be sure you're immune than to risk your baby's

Thinking about another pregnancy

If you do get pregnant in that first cycle, that's not going to make you more likely to miscarry There is even some evidence that conceiving in the first six months after a miscarriage actually lowers the risk of a second miscarriage Usually you and your partner are the best judges of how soon to try again But you may be advised to wait longer if: • you've had a molar or ectopic pregnancy

Endometriosis, Fertility and Pregnancy

If you are trying to get pregnant, there is no treatment currently available to slow the progression of endometriosis (all medical treatments apart from some painkillers can be harmful to the unborn child and you are advised to use barrier contraception during treatment) If you are planning a family sometime in the future, but not just now, the Combined Oral Contraceptive Pill (COCP) may help

Student pregnancy and maternity: implications for higher ...

Pregnant students have faced issues including being forced to withdraw from their course, taking longer out of their course after giving birth than they would like, and being prevented from sitting examinations The exact number of students who become pregnant during their course is unknown The NUS interviewed 2167 students in higher and further education with children, and found that 29 per

## Diabetes in pregnancy

You should be advised to take folic acid while you are trying to get pregnant and for the first 12 weeks of pregnancy. This helps lower the chances of your baby having a condition called a neural tube defect, for example spina bifida (where parts of the backbone do not form properly and damage the baby's central nervous system). You should take a higher amount of folic acid (one 5mg tablet a

Isotretinoin (Accutane®) | MotherToBaby

Can isotretinoin make it more difficult to get pregnant? Women who are trying to become pregnant should not be taking isotretinoin. There have been reports of irregular menstrual periods in some women taking isotretinoin. There are no reports of problems getting pregnant while taking isotretinoin. I just found out I am pregnant. Should I stop taking isotretinoin? Stop taking the medication.
