Search for Axionic Dark Matter - Department of Physics

large, a direct dark matter search may be made more sensitive by having it look specifically for sharp peaks in the energy spectrum Moreover, it has been pointed out[30] that one or more peaks may be further enhanced because the sun lies close to a caustic ring in the dark matter distribution In a [31] of caustic rings to the galactic rotation curve, it is found that the local density is

Search for Vector-mediated Dark Matter

The existence of dark matter (DM) motivates us to explore physics beyond the Standard Model (SM) Although there are lots of new physics models that explain the origin of DM, simplified models of dark matter have been adopted as benchmark scenarios to study the DM search strategies at the LHC [1] Following the recommendations for conducting the systematic DM searches by the LHC Dark Matter
