Harmful bacteria can grow in food that is not defrosted ...

Keep meat/poultry separate from other food when it is defrosting, to prevent cross-contamination. Once food has been defrosted you should use it immediately (within one day). CHECK IT WHY? HOW DO YOU DO THIS? When you think food has defrosted, it is important to check to make sure. The outside may look defrosted but the inside could still be frozen. Check for ice crystals in the food.

Let them eat CAKE

Let them eat CAKE. The Victoria sandwich is a WI icon and the story of this simple sponge reflects a century of rapid change. Is there a more potent symbol of the WI than the Victoria sandwich? Buttery and light, filled with a layer of raspberry jam and with its golden surface dusted with a fine coating of caster sugar, its very simplicity denotes the challenge it presents to bakers and oven.

The global map of who eats too much meat

Just how much meat there is in the world. A great deal of all the meat is made up of humans. When world population passed seven billion people in 2011 we humans weighed, in total, 350 million tonnes. That weight is rising rapidly as our numbers are still rising and we are getting heavier. Back in 2011 each of us weighed, on average just under 8 stone. 1 Around two billion or us were children.
